

## Product information: POLYCARBONATE

### General information:

Polycarbon (pc) is a synthetic sheeting supplied in clear and opal versions.

Polycarbon is unique for its impact-resistant qualities.

The material has an extremely high impact resistance. It is 250 times stronger than glass.

### The material has the following qualities:

- Easy to process (cold bending/setting possible)
- Easy to cut and drill.
- Suited for both indoor and outdoor applications.
- Fire class B1 (self-extinguishing).

### Characteristics of the material:

Minimum and maximum temperatures for use: between -30 and +120 C

Length and width tolerance: + / - 1,0 mm.

### Supply:

Polycarbon sheet can be supplied in clear and opal versions.

Thicknesses are between 1 and 9.50 mm.

Standard size is 500 x 500 mm.

Maximum length we can supply is 6000 mm. Maximum width is 2000 mm.

Should a different dimension be required, please mail us your requirements and we will make you a suitable offer.

### Applications:

- exhibitions
- stands, fairs
- interior
- windows for boats
