

## Product information: POLYPROPYLENE

### General info:

Polypropylene (pp) is a synthetic film with a modern appearance and very special characteristics.

### The material has the following qualities:

- Very strong and tough
- Easy to punch, score or cut
- After scoring excellently hingeable
- Easily printed, the material has had a special treatment, making it suitable for printing. In the course of a few months this treatment wears off. Please, bear this in mind when printing is considered. We always supply new, recently treated pp film
- The material has a very low surface tension, making gluing difficult. Pieces are often joined using press studs, wire, etc.

### Characteristics of the material:

Minimum and maximum temperatures for use: between -10 and +110 Celsius

Fit for foodstuffs Yes

Length and width tolerance: +/- 1.0 mm

Specific gravity: 0,92 gr/m<sup>3</sup>

### Supply:

Polypropylene film can be supplied in various kinds. It is possible for the material to have a different finish on either side:

matt/glossy

glossy/glossy

glossy/ribbed

glossy/striped

Standard sizes are: 1100x650 mm, 1300x1000 mm, 1400x1000 mm, dependent on the finish

Should a different dimension be required, please mail us your requirements and we will make you a suitable offer.

### Applications:

- displays
- portfolios, diaries
- lamps
- packaging
